

# Cisco WebEx for Government from Verizon

**Empower your workforce with the tools to collaborate and communicate while keeping costs under control**

Your stakeholders may not work in the same office, but they need to work together as if they do. You need a solution that offers audio and video communication, as well as the ability to share data in real time.

Cisco WebEx for Government from Verizon helps you hold more productive meetings – from any device, virtually anywhere in the world. Because WebEx for Government is cloud-based you also benefit from flexible integration and predictable costs. You also get enterprise-grade security to help keep your meetings private.

**Collaboration is vital to keeping your organization running. The latest conferencing services help your dispersed teams do just that. But not every solution is the same.**

## Keep your meetings on track

Virtual meetings help your remote teams conduct more effective meetings – participants can share documents in real-time. Our solution also makes it easier to manage the meeting once it starts thanks to features like an integrated list of meeting attendees, participant dial back and active speaker icons.

## Collaborate virtually anywhere, on any device

Empower your people to join meetings from any device, whether it's from a regular phone, smartphone, a desktop or tablet. WebEx for Government connects all participants, employees, other agency workers and external contractors. Now you can effectively collaborate with anyone, virtually anywhere in the world.

**WebEx for Government is FedRAMP<sup>SM</sup> authorized. Gain a cost-effective and reliable approach for the adoption and use of cloud services by U.S. government agencies.**

# Leverage your existing PBX for end-to-end conferencing

WebEx for Government pairs Verizon's global IP network with Cisco's Cloud Collaboration solutions, so you benefit from an end-to-end solution. With WebEx CCA you can use your on-premise IP telephony network to provide integrated audio for WebEx Meetings.

Our solution also provides toll and toll-free numbers, and gives attendees the option to connect using Voice over IP (VoIP) via their computers' built-in audio capability. You'll experience outstanding audio quality, even over low-bandwidth networks, with wideband audio support for VoIP.

## Key benefits:

- Provide an exceptional user experience with integrated audio, video and web conferencing across any type of device.
- Extend investments in existing infrastructure and simplify IT management by transparently adding audio conferencing into existing data and voice infrastructure.
- Scale conferencing capabilities to more users, stay current with advanced features, and reduce complexity with upgrades delivered quickly and automatically from the Cisco Collaboration Cloud.
- Predict monthly budgets with ports-based pricing, and control costs by eliminating PSTN transport and termination charges for on-net users.

*Designed. Delivered. Optimized. Together.*

# Scalable, predictable cost management

With WebEx for Government, you can add connections to your solution as and when your agency needs them – scale up as and when you need to.

It also helps you manage your budget by removing standard bridging charges – you connect directly to Cisco's WebEx audio bridge. And it provides toll-free or local phone number access for participants.

## FedRAMP authorized

Gain a FedRAMP authorized, cost-effective, secure approach for the adoption and use of cloud collaboration services. By standardizing security controls and processes, the FedRamp program can deliver a cost effective solution with an accelerated implementation. You can be confident in the security of the cloud technologies you're using. To learn more about FedRAMP, visit [fedramp.gov](http://fedramp.gov).

**Cloud Connected Audio (CCA) capitalizes on Verizon's SIP connections and Cisco's FedRAMP CCA/Webex to help control your audio conferencing costs.**
